EXECUTIVE DIRECTOR

Gentlemen:

Enclosed is information pertaining to MICRO-WILL, a microfilming service provided by Davis Memorial Goodwill Industries of Washington. The goal of MICRO-WILL is to provide archival quality micro-filming services to government and industry at competitive prices. Our success in this field will enable us to train handicapped persons for gainful employment in our facility and to provide competent employees to other microfilming organizations in the area. This project will assist these handicapped persons to gain dignity, self-confidence and to become productive members of our labor force.

We are in operation and ask for your support in terms of microfilming contracts. The services offered in our brochure and the attached schedule of fees are currently available. We will perform any task within our capability and we will accept small orders to prove our reliability. For additional information and sales assistance, call MICRO-WILL at 337-2775. We guarantee outstanding workmanship.
